

MY HEALTHY SMILE: dental sealants

What are they?

A product that penetrates and hardens in the pits and fissures of molars.

For whom?

Starting at around age 5-6, as soon as the permanent molars come in.

Why?

The sealant creates a smooth surface that makes cleaning easier and reduces the risk of cavities.

How?

The sealant is easily applied in just a few minutes, without anesthesia, thanks to a simple technique.
